

*Naviance™ Oncology
Nurse Navigators:*

Guiding Your Employees through Their Cancer Journey

Oncology Nurse Navigators are the heart of the Johns Hopkins Naviance program. Our clinically trained nurses help your workforce navigate every aspect of cancer-related care—from screening and prevention through diagnosis, treatment, survivorship, end-of-life care and caregiving.

Holistic Cancer Navigation Integrated with Your Benefits

Every person's cancer journey is different. Naviance Nurse Navigators help find the best options for each unique situation. They focus on quality of life for all employees, meeting each individual's personal goals and wishes while helping to contain health care costs through preventive care, risk reduction and navigation to the best treatment options in case of a diagnosis.

Work with Naviance to support your workforce.

By connecting your employees to a Naviance Nurse Navigator, you ensure that they receive compassionate care and respect, expert navigation to high quality treatment options nationwide and access to personalized resources to support them at work and at home.

Our Nurse Navigators have access to a network of 9,000+ other cancer navigators nationwide—to support hyper-local treatment and care.

JOHNS HOPKINS
MEDICINE

“Other oncology programs were either too technical or too generic. [With this program], we finally found the **right blend of oncology expertise and personal support.”**

DIRECTOR OF HEALTH CARE PLANNING

Relationships Make All the Difference

A relationship with a Naviance Nurse Navigator provides the trusted emotional support your employees need to navigate a difficult journey. Targeted management training helps your leadership support an affected colleague.

Access to unlimited one-on-one sessions with a Nurse Navigator via text, email or phone helps your employees and their loved ones with:

Risk Reduction and Prevention

- Reducing cancer risk through lifestyle change
- Understanding personal risks related to family history or genetics

Education and Support

- Preparing questions to ask doctors and care teams
- Learning about financial resources and what to expect from treatment
- Understanding how managers and employees can talk sensitively to their coworkers, family and friends about a cancer diagnosis
- Receiving compassionate emotional support during the cancer journey

Navigation to Care

- Understanding and interpreting a cancer diagnosis
- Locating a second opinion team— in-network and local or nationwide
- Navigating the decision to keep working during treatment, including employee rights, bene fits and labor laws
- Transitioning into survivorship after treatment
- Planning for the future, including advanced directives and end-of-life care

We provide dedicated, personalized support to contain costs, reduce risk and maintain quality of life.
