

Breast Basics

What you need to know about the most common cancer in women worldwide, from experts at Johns Hopkins HealthCareSolutions.

1 IN 8 AMERICAN WOMEN WILL DEVELOP INVASIVE BREAST CANCER IN THEIR LIFETIME.

EVERY 2 MINUTES

someone in the U.S. is diagnosed with breast cancer; more than **90%** will become survivors.

6 SYMPTOMS

to have checked (that aren't a lump):

Breast Pain

Breast Swelling

Nipple Abnormalities

Skin Irritation or Dimpling

Thickening of Nipple or Skin

Nipple Discharge

Know the geography of your breasts. When doing your breast self-exam, look for a change from one month to the next.

Source: ACS

85%

of women who are diagnosed with breast cancer **do not have any family history of the disease.** Schedule your mammograms and complete your monthly self-exam, even if cancer doesn't run in your family.

RISK FACTORS

you can control:

Reduce alcohol consumption

Stop smoking

Maintain a healthy weight

Get regular, quality sleep

Maintain a healthy diet

Stay active

There's no strong scientific evidence to suggest that any of the following are potentially dangerous:

Bras

Hair Dyes

Antiperspirants

LOWER YOUR RISK BY 18%

by walking briskly 75 to 150 minutes per week.

Source: ACS

1 ALCOHOLIC DRINK

per day **increases** your risk by about **7%...**

2-3 ALCOHOLIC DRINKS

per day increases your risk by **20%.**
